ABOUT ME

AI/ML & Software Development Student

Computer Science (AI & ML) student with hands-on experience building AI tools, ML pipelines and full stack applications. Strong foundation in Python, machine learning, full stack development, and data processing. Focused on building real-world AI applications and scalable systems.

SKILLS

- **Languages**

Python,, JavaScript, SQL, HTML, CSS

- **AI / ML**

NLTK, Machine Learning, NLP

- **Frameworks & Tools**

ReactJS, NodeJS, Flask, Git, GitHub

- **Languages known**

English, Kannada, Telugu

EDUCATION

Ramaiah Institute of Technology, Bengaluru, Karnataka | 2023-present

Bachelor of Engineering in Computer Science (AI & ML) | Pursuing

Expert Pre University College, Mangaluru, Karnataka | 2023

PCMC | Completed

PROJECTS

StudyVerse – AI Study Assistant : Python, Flask, NLTK, Scikit-learn

Built an AI study tool with text summarization, ML difficulty scoring, and resource aggregation.

FarmGuide – Smart Farm Management Platform : React, FastAPI, MongoDB

Developed a full-stack application for crop tracking and farm analytics using FastAPI APIs and MongoDB.

The Divine Gita - Comic Depiction of Bhagavad Gita : Next.js, React, JSON

Developed a responsive reader for 18 chapters and 700+ verses with dynamic routing and comic-style UI.

Distributed Hadoop Cluster Deployment : Hadoop, HDFS, YARN

Configured a multi-node Hadoop cluster to run distributed data processing workloads.

ACHIEVEMENTS AND INTERESTS

- CGPA 8.83 in Computer Science (AI & ML).
- Focus on AI/ML, full-stack development, and scalable software systems.
- Experience developing AI-driven and distributed applications.
- Proficient in learning and applying new technologies quickly.
- Strong interest in building real-world technology solutions.
